THE WILDLIFE CONSERVATION AND MANAGEMENT ACT

(Cap. 376)

MARA NABOISHO CONSERVANCY MANAGEMENT PLAN, 2026–2030

IN EXERCISE of the powers conferred by section 44 (3) of the Wildlife Conservation and Management Act, the Cabinet Secretary for Tourism and Wildlife gazettes the Plan in the Schedule hereto:

SCHEDULE

Mara Naboisho Conservancy Management Plan 2026-2030 (hereinafter referred to as “the Plan”) defines the goals, objectives and actions that Mara Naboisho Conservancy (hereinafter referred to as “the Conservancy”) has designed to address natural resource conservation, livestock management, community livelihoods development, tourism development and the Conservancy’s operations.

The Conservancy’s vision, zonation scheme, management programmes and plan implementation strategy are presented in the following sections.

1. Vision

The Mara Naboisho Conservancy strives to:

‘Continue to come together to model a sustainable future for the local community, tourism partners, land and wildlife, in which all can flourish.’

2. Land Uses and Zones

The plan sets out a zonation scheme to support sustainable land use and effective resource management within the Conservancy. The primary land uses include wildlife conservation, livestock production and tourism. The zonation scheme categorizes land use activities into six zones: Host Parcel Zone, Livestock Grazing Zone, Core Conservation Zone, Special Habitat Zone, Tourism Facility Zone and Riparian Zone.

3. Management Programmes

The Plan comprises five (5) management programmes that address the key issues affecting the Conservancy. These programmes are summarised in the following sections.

3.1 Natural Resource and Land Management Programme

The purpose of the Natural Resource and Land Management Programme is to maintain, enhance, restore and monitor the ecosystem integrity, biodiversity and habitat quality of Mara Naboisho Conservancy and its connected landscapes using high-quality science, ensuring long-term benefits for both nature and people. The programme aims to achieve this purpose through implementation of management objectives that focus on: protecting key wildlife corridors, prioritizing and implementing sustainable land management and restoration, ensuring decisions in conservation are supported by scientific data, and maintaining high standards of ecological integrity.

3.2 Livestock Management Programme

The Livestock Management Programme aims to create a regenerative livestock system that delivers healthy rangelands, cattle, community and wildlife through an integrated approach grounded in improved grazing management and value addition. This will be accomplished through the implementation of management objectives that focus on: improving grazing practices to support rangeland recovery and wildlife health, strengthening collective risk management and animal health services, increasing value addition and market access for landowners, and improving the Naboisho livestock predation scheme.

3.3 Tourism Development and Management Programme

The Tourism Development and Management Programme endeavours to ensure the Conservancy continues being internationally recognised as a leading model of high-end, low-impact eco-tourism in Kenya. To achieve the programme’s main goal, three management objectives have been developed. They focus on: maintaining a high-quality and low-impact tourism experience, developing and promoting the Naboisho brand, and diversifying and increasing tourism offerings and the value chain.

3.4 Community and Livelihoods Programme

The goal of the Community and Livelihoods Programme is to enhance the social well-being and livelihoods of the local community by fostering partnerships between the Conservancy, landowners and local partners, ensuring the long-term value of the Conservancy to its members. The programme’s key management objectives focus on: improving local livelihoods, empowering local women and promoting gender inclusivity and equitable participation, improving social service standards within and around the Conservancy, fostering trust and transparency with landowners, strengthening collaboration among development partners, and enabling enterprise infrastructure that supports community producers.

3.5 Conservancy Business and Operations Programme

The overall goal of this programme is to enhance operations, improve financial credibility and diversify revenue streams building on Naboisho’s success. The programme seeks to achieve this purpose through the implementation of management objectives that prioritize aligning Naboisho’s operations and governance with best practices, diversifying the Conservancy’s annual revenue beyond tourism, and maintaining and improving the Conservancy’s operational efficiency.

4. Plan Implementation, Monitoring and Evaluation

A 5-year implementation plan has been developed to facilitate the implementation of the Conservancy Management Plan. The plan outlines the management actions and activities under each of the five management programmes. The plan also provides a monitoring and evaluation framework for assessing the potential impacts of implementing each management programme.

The Plan is deposited at the offices of the Director General, Kenya Wildlife Service along Langata Road and Mara Naboisho Conservancy whose addresses are provided below:

THE WATER ACT

(No. 43 of 2016)

NYASARE WATER SUPPLY AND SANITATION COMPANY LIMITED

APPROVED TARIFF STRUCTURE FOR THE PERIOD 2026/2027 to 2028/2029

The Water Services Regulatory Board (WASREB), under the powers granted by section 72 (1) (b) and (2) of the Water Act, 2016, has approved the regular tariff adjustment for the area served by Nyasare Water Supply and Sanitation Company Limited (NYAWASCO).

Nyasare Water Supply and Sanitation Company Limited (NYAWASCO) applied to the Water Services Regulatory Board (WASREB) for review of water services tariffs, for the period 2026/2027 to 2028/2029 as per section 72 (1) b of the Water Act 2016.

Public consultation on the NYAWASCO application was carried out in accordance with the requirements of section 139 of the Water Act 2016.

Having considered the application, the written and oral submissions by all stakeholders and the current data, WASREB has determined that an upward tariff review is justified for NYAWASCO to improve service delivery, operate sustainably and protect consumer interests by meeting the conditions attached to the tariff.

WASREB hereby gives a one-month notice from the date of this communication to all existing and potential customers of NYAWASCO that the structure of approved tariffs for water services for the three financial years 2026/2027, 2027/2028 and 2028/2029 shall be as follows:

GAZETTE NOTICE NO. 9150

THE WATER ACT

(No. 43 of 2016)

GITHUNGURI WATER SANITATION COMPANY LIMITED

APPROVED TARIFF STRUCTURE FOR THE PERIOD 2026/2027 to 2028/2029

The Water Services Regulatory Board (WASREB), under the powers granted by section 72 (1) (b) and (2) of the Water Act, 2016, has approved the regular tariff adjustment for the area served by Githunguri Water and Sanitation Company Limited (GIWASCO).

Githunguri Water and Sanitation Company Limited (GIWASCO) applied to the Water Services Regulatory Board (WASREB) for review of water services tariffs, for the period 2026/2027 to 2028/2029 as per section 72 (1) b of the Water Act 2016.

Public consultation on the GIWASCO application was carried out in accordance with the requirements of section 139 of the Water Act 2016.

Having considered the application, the written and oral submissions by all stakeholders and the current data, WASREB has determined that an upward tariff review is justified for GIWASCO to improve service delivery, operate sustainably and protect consumer interests by meeting the conditions attached to the tariff.

WASREB hereby gives a one-month notice from the date of this communication to all existing and potential customers of GIWASCO that the structure of approved tariffs for water services for the three financial years 2026/2027, 2027/2028 and 2028/2029 shall be as follows:

PURSUANT to section 59 of the Environmental Management and Co-ordination Act, Cap. 387, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, National Irrigation Authority, proposes to construct Athi Dam Project comprising a mixed-type dam (concrete and concrete faced rockfill) with a storage capacity of 306.4 million cubic metres within a 33,610 Km² catchment, creating a 38Km² reservoir (approximately 13km long and 6km wide) at a norm; water level of 232.0m; the dam will have a maximum height of 34m, including a 3,308m rock-fill section with a 10m crest width and a 164m concrete section incorporating a 122m spillway, gate chamber, intake and flushing sluice, designed to regulate an average annual flow of 76.2m^{3/s}, manage sediment loads of 2.334 million tons per year, support irrigation supply of 46m^{3/s} and other associated facilities and amenities within Tsavo East National Park in Taita Taveta County.

The following are the anticipated impacts and proposed mitigation measures:

Anticipated Impact Mitigation Measures

- | | |
|-----------------|--|
| Loss of habitat | <ul style="list-style-type: none"> Prohibit unnecessary vegetation clearing. Demarcation and restriction of construction sites. Sparing mature trees. Plan for vegetated buffer zones with suitable indigenous tree species around the dam and along the canal. Establishment of continuous ecological monitoring system. Collaboration between KWS and other stakeholders on habitat rehabilitation plans/programs. |
| Land use change | <ul style="list-style-type: none"> Ensure that the workers' camp will be temporary. Preparation of a restoration plan on the entire dam project area. |

Anticipated Impact Mitigation Measures

Habitat fragmentation	• Demarcation and restriction of construction site. • Establishment and strengthening of community conservancies-as compensation of land used. • Establishment of continuous ecological monitoring system.

Dam/canal safety risks	

Anticipated Impact Mitigation Measures

Water flow alteration	• Provision of artificial water pools for utilization by hippos and crocodiles. • Restrict construction works to dry season when there is low water flow to ensure minimal river diversion.
	• Drilling a well near the river to provide water for the camp. • Build sedimentation tank and reservoir in the camp.
	• Moving vehicle speed control to be limited to 40 KM/H. • Sensitize drivers to observe park speed limits. • Adequate hoarding of the construction site. • Adequate signage on key wildlife corridors. • Observe Park working hours 6.00 am to 6.00p.m. • Immediately reporting any wildlife accidents for clinical interventions. • Proper record keeping of any wildlife accidents or kills. • Use of quarry stone aggregate or quarry chips as buffer along the canal in place of grass to discourage wildlife from breaching the fence in search of foliage.
	• Conduct regular water quality analysis. • Construction of check dams control siltation. • Inter-agency coordination between NIA, KWS, NEMA for regulation of water resource. • Liaison with communities on the catchment areas upstream.
Increased water demand

Liquid waste pollution	- Provision of temporary conservancy tank and mobile lavatories within the workers' camp. - Engage NEMA and County licensed waste handlers. - Provision of a service bay for machinery and equipment. - Ensure proper decommissioning of the conservancy tank after completion of the construction works.
Soil erosion	- Create and maintain soil traps and embankments. - Excavated soil to be used for back filling. - Confine vegetation removal to the surveyed dam components' extent only. - Sprinkling water on the construction sites. - Undertake soil stabilization and conservation measures-retainer walls/gabions and riprap.
Natural landscape alteration	- Habitat rehabilitation using the indigenous tree species e.g. <i>Acacia tortilis</i> and <i>Balanites aegyptica</i>. - Backfilling of excavations, voids etc. - Direct seeding. - Continuous monitoring of the revegetation process.
Change in river discharge	- Installation river gauging stations around the dam and upstream to monitor effects of the dam to the river basin over time. - Controlled abstraction of water from the Galana River to the dam without compromising the natural continuous
